Our Group

International Dunnage is a global leader in load securement solutions, specializing in the manufacturing and supply of PW dunnage airbags, bladder bags, safety sheets, PP fabric, and PE shrink film. We also offer a comprehensive range of cargo securement products, including strapping, lashing, rubber mats, anti-slip sheets, and desiccant bags.

With over 20 years of expertise in extrusion, weaving, and dunnage airbag production, International Dunnage has earned a reputation as a trusted brand in the industrial packaging and load securement industries. Headquartered in Savannah, GA, our operations span globally, with manufacturing centers in the Dominican Republic and Turkey, and distribution facilities across North America and Europe.

Both our Turkish and Dominican facilities deliver high-quality products, including AAR-verified airbags (Levels 1–5), SQ airbags, and safety sheets.

Our Dominican Republic facility is the only vertically integrated PW Dunnage Airbag production center in the Americas, equipped with on-site testing, technical laboratories, and recycling capabilities. This allows us to minimize lead times and maintain stringent quality control at every stage of production.

At International Dunnage, we prioritize delivering exceptional customer service, technical support, and tailored load audits. With robust inventories and strategically located facilities, we ensure efficient and reliable delivery for our customers worldwide.

- Metal, Wood Products
- Ceramic, Glass, Marble
- Paper
- Food & Beverage
- Wholesalers & Retail Chains
- Logistic Companies

“ Testimonials

"Since we at Spliethoff Group obtained International Dunnage (ID) polywoven PP airbags, our sustainability has increased! They are light in weight, conform to the curvature of our various cargoes, and are able to withstand cold, heat and humidity. We like the fact they are re-useable/recyclable and environmentally friendly. ID has substantially contributed to our high standards in quality ocean carriage service for almost two decades and their products are highly recommended!"

Peter Herkemij Spliethoff Transport B.V.

Our Services

International Dunnage provides the world markets one stop shopping experience for complete line of cargo securement solutions.

Whether you transport your cargo by land, sea or rail, it is vital to keep the load safe and stable to prevent potential damages to the cargo and avoid tedious damage claims.

International Dunnage provides its customers 360° service, by not only manufacturing and selling the most needed load securement products but also offering dedicated customer service, superior technical support and year-long trainings.

Strapping

Buckle Up And Enjoy The Ride with ID Strapping

ID Strapping stands out from the crowd, replacing and outperforming steel strapping with a stronger, safer and more flexible solution; Saving Our Customers Time, Energy and Money.

ID Strapping reduces the risk of injury and minimizes damage to cargo due to cuts caused by sharp edges.

Strapping Types

US HQ: +1 (912) 355 88 84
European HQ: +90 (216) 593 46 00

1

Composite Strapping

With a unique combination of elongation and flexible memory, ID Composite Strapping can absorb impacts and load shift that would normally break steel banding. ID Composite Strapping is soft, pliable, will not rust and eliminates risk of personal injury during application as well as damage to product being shipped.

2

Hot Melt Strapping

ID Hot Melt Strapping is safe, soft and smooth to protect edges and surfaces being secured. They are economical, provide a very high break load capacity and can be tensioned by hand or basic tensioning tools. Popular applications include manual strapping and bale pressing of non-abrasive products such as paper.

3

Woven Strapping

Woven Strapping is cost effective and is primarily used for securing heavy and extra heavy loads such as metal products and rail load shipments.

Strapping TDS

Why Strapping?

- Co-extruded high tenacity polyester yarns
- High quality polypropylene coating
- Light weight and portable
- High shock absorbing capacity
- Safe for users and receivers
- High resistance to weather conditions (-10 to 50 °C)
- Wide range of accessories(tensioners, dispensers, lacing rod)
- High breaking strength
- Fast and easy to apply, handle and dispose
- High abrasion resistance
- Resistant to acid/alkali
- Resistant to corrosion
- Less expensive than other load securement products

- 15 Pallets per Truckload / 120.000 SQ FT

Desiccant Bags

Soak It Up with Id Desiccant Bags ID Desiccant Bags

Protect your Cargo from Moisture Damage, Rust and Mold.

Reliable and Cost-Effective Dehumidification Solutions

Desiccant Bags

US HQ: +1 (912) 355 88 84 European HQ: +90 (216) 593 46 00

1

ID Desiccant Plus

The new generation ID Desiccant Plus bags have a moisture absorption capacity up to 300% of its weight due to its special polymer formula. It works effectively by providing long term and delicate moisture protection of your cargo especially during overseas shipments.

2

ID Silica Gel

ID Silica Gel packages offer a safe packaging environment thanks to its dehumidification capacity exceeding 35% of its weight, its performance in wide temperature and humidity range and its dust-tear resistant nonwoven package.

3

ID Gel (CargokGel Water Bag)

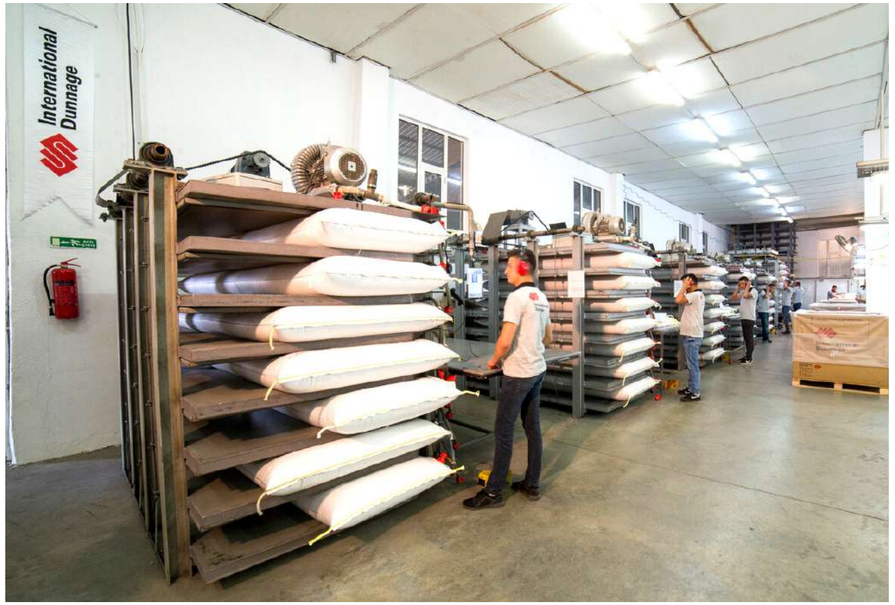

ID Gel has a unique hanger as the irreversible clip secures the bag to the lashing point inside the shipping container. The absorbed moisture forms a gel inside the bag and it has the capacity to absorb more than 300% of moisture relative to its weight at 95% relative humidity and 40 degrees Celsius. ID Gel meets the Federation of Cocoa & Commerce Ltd. requirements for shipments of cocoa beans inside containers.

4

ID Express (CargokGel Packaging)

ID Express Gel is your perfect choice for use in both trailers and containers. It is ideal for short trips and has a moisture absorption capacity of up to 400% of its weight. It comes with an adhesive backing and it is leak proof by making use of advanced membrane technology.
